**Vineyard Management Services**

- *Temporary Worker Suppliers*
- *Vineyard Consultancy*
- *Planting and Maintenance*

## We work to lead our industry .....not follow it

We are a leading company within the vineyard industry because we don't just settle for what everyone else is doing. We seek innovation and improvement in everything we do, and we aren't afraid to work hard for our clients. Working with us means joining the Vitis Care family, and that means a lot to us. We go above and beyond because, frankly, we think "just doing our job" would be pretty boring. We're not content being average, we're here to change lives.

## Meet the Management Team

**Virgil Moise** - My interest in horticulture began in Romania where I planted, grew and harvested apple trees but my career in viticulture began in 2009 working on vineyards in France and Portugal. It was during this time that I developed a passion for viticulture. After accepting the vineyard manager role at Blackdown Ridge Virgil recognised that there was a shortage of experienced vineyard workers in the UK and from this Vitis Care UK was born.

**Chris Hackett** - My background is in company law and legal drafting documentation. I am fortunate enough to be able to live in New Zealand 9 months a year where I operate a small vineyard in the Marlborough region of the South Island. I deal with all new contracts, administration and payroll services for Vitis Care and also work closely with the other directors to expand operations in the UK.

**Adina Moise** - My love of viticulture and the desire to make Vitis Care one of the major suppliers of Temporary Workers to vineyards in the south of England can only be matched by my love of the cultivation of flowers! My other role is worker support and I am always available, even at weekends – in the garden course!

**We are Gangmasters and Labour Abuse Authority (GLAA) licenced labour providers committed to responsible and ethical recruitment. We are also members of the Association of Labour Providers**

## Why is Vine Management Important?

Growing grapes in the UK is filled with challenges and it is vital we are prepared to adapt and implement the viticultural practices required at the right time as no two years are ever the same. Being able to efficiently deliver a balance between quality and yield, consistently across multiple vintages is essential to any grape growing business.

## Temporary Worker Suppliers

Migrant labour is now recognised as the backbone of the industry among the large-scale growers. They are renowned for their dependability and hardworking ethics in terms of productivity, skill, speed and work rate and, due to the slow uptake of domestic workers within the viticulture sector, vineyards are still short of skilled labour.

**Vitis Care** can supply Temporary Workers to your vineyard.

We are passionate about our work and operate with the highest standards. We can supply all services (and/or workers) to the viticulture industry and ensure that everything is carried out efficiently and within agreed timescales.
